Client
The Taubman Co.

Selling Price
\$43,780

The pylon signs built by Adcon are 22 ft. tall from the polished stainless steel base to the top of the Quartz Stone White face. The signs are 7 ft, 3 in. wide and 20 in. deep, constructed of an aluminum tube frame, and incorporate two different materials for the faces. The burgundy portion of the sign is 1/8-in. aluminum, fabricated with a radius to soften the appearance and give it more depth. Running vertically from top to bottom is a Quartz Stone White "Trend Rock" by Ceramic Technics, Ltd. The logo was Waterjet cut in the top portion of the stone with a 1 1/2-in. thick acrylic push through logo illuminated to "float" above the sign at night.
